Stock position as recorded 6 and 9 March 2026

ASIN and RRP each are the only columns to be typed in. Both are shaded and shown in blue. Everything else calculates or pulls through.

Total RRP value is units multiplied by RRP. Blank RRP lines stay blank rather than showing zero.

Quantities and pallet counts are taken from the DS Brands stock list

Unit figures are pallet counts totalled per SKU. No physical recount has been carried out.

The stock list records zero damages against every pallet. Condition shown as new and boxed on that basis.

Seven pallets of FBA customer returns carry no recorded quantity. These are mixed and unchecked, and should be viewed before an offer is made.

No expiry dates are recorded against any line.
